

Security Awareness Training Build Your Human Firewall

Defend Against Real World Attacks

Growing cybersecurity threats and changing nature of threat vectors is forcing enterprise invest in building a mature Security Awareness Training (SAT) program. Employees are your first line of defense against cyber attacks and imparting end user security awareness training can protect your business & reputation

Our fun and engaging training content can help transform your awareness and build cyber resilience. Awareness processes are based on a series of 3-minute

single-topic lessons delivered to all your internal and external users every 3 weeks – all year round. This spaced repetition technique has been proven to enhance learning and retention while ensuring high engagement levels.

Powerful analytics provide you the insights to measure effectiveness of the program and deliver personalized content for role-based training.

Broad Topic Coverage

- Security Awareness Essentials
- Password Management
- Working Remotely
- Phishing & Ransomware
- Business Email Compromise
- Social Engineering
- Email & Instant Messaging Security

- Malware Best Practices
- Insider Threats
- Preventing Malware-Mobile Devices
- Privacy, Data Protection, GDPR
- Cloud Security
- Incident Reporting
- Cryptojacking

Phishing Simulation

Phishing emails are a major source of data breaches in organizations. Train employees to identify, manage and report real phishing attacks.

A variety of customizable phishing templates and lures are available in the system. When a user clicks on a phishing-simulation link, a customized response lesson is delivered, informing, and training the user on the topic at hand.

“ **94%** of all malware is delivered by email ”

~Verizon Data Breach Report 2019

Role Based Training

One-size-fits-all SAT training has been found to be inadequate in building an organization's defenses against cyber-attacks.

Role based targeted training can help your finance

department detect financial attacks like Business Email Compromise, your software development teams learn the important of secure coding practices and your marketing team gets exposure to data privacy training

Spaced Learning & Repetition

Annual SAT programs conduct as a ritual once a year may be adequate for checkbox compliance but do not build battle readiness to handle cyber attacks and the changing threat vectors in the environment today.

We leverage a spaced learning with repetition technique

to deliver a continuous all-year-around training program to foster engagement and retention. Our awareness processes are based on a series of 3-minute single-topic lessons delivered to all your internal and external users every 3 weeks – all year round.

Data Privacy & Compliance

Data Privacy training ensures employees are trained on data privacy issues and various compliance mandates like GLBA, PCI, HIPAA, CCPA & GDPR.

Our data privacy and GDPR training feature customized role-based training for IT users, HR, Marketing, Controllers and Processors.

Cloud Hosted Platform

Roll out training at scale to your distributed workforce and supply chain partners with our platform hosted on the Azure cloud infrastructure from Microsoft.

Solution integrates with Azure Directory Services and identity access platforms like OKTA for automated user and organizational structure management. Insightful analytics and reporting provide powerful drill down capabilities.

Key Benefits Summary

- All-Year-Round Training
- Fun & Engaging Content
- Built for the Mobile Generation
- Easy & Fast Customizations
- Automated Notifications & Reminders
- Assessments & Quizzes
- Integrate Custom Content
- Podcast Mode Option

“ Average cost of a data breach is **\$3.8Mn** ”
